

# Investing in your gas supply

## Broughton Street area

## Edinburgh

**SGN**  
Your gas. Our network.

## We're investing £500,000 to upgrade our gas network in the Broughton Street area of Edinburgh.

This essential project involves replacing our old gas mains with new plastic pipe to ensure a continued safe and reliable gas supply for the local area for many years to come.

We've worked closely with the local authorities in planning our project. Our work will begin on Monday 7 January 2019 and take around 26 weeks to complete.

We'll be working in Broughton Street between York Place and the roundabout for London Street/East London Street for approximately 12 weeks. The road will be closed to northbound traffic and parking restrictions will be in place.

We will then be working in London Street and Forth Street, and parking restrictions will be in place.

During our work in Forth Street, the road will be closed in two separate sections. Motorists will be required to follow signed diversion routes.

To help you understand more about this project, we'll be holding a drop-in session on **Thursday 3 January** in the Drummond Room, Broughton St Mary's Church, Bellevue Crescent, EH3 6NE. We'll be there between 3.30pm-6.30pm to answer any further questions you have.

You'll find further details, such as where we'll be working, overleaf.

# Where is the work taking place?

## Key

Work area 

We'll be working Monday to Friday between 8am-4pm, and at weekends where required.

We are sorry about any inconvenience our work causes and would like to thank road users for their patience. This is a complex engineering project, however we always aim to minimise disruption whenever possible.

If you have any specific enquiries about this project, please call us on **0131 469 1728** during office hours (8am to 4pm) or on **0800 912 1700** outside these times.

To access this leaflet in an alternative format please call **0800 912 1700**
