

Investing in your gas supply

## Clarkston area

### Glasgow

We're replacing existing metal gas mains and services with modern plastic pipe to ensure the Clarkston area in Glasgow continues to receive a safe and reliable gas supply for many years to come.

This essential work forms part of an ongoing mains replacement programme developed with the Health and Safety Executive. Following discussions with East Renfrewshire Council, our project will begin on Monday 31 March and last until November 2025.

We'll be working in the following streets.
