AVK Donkin Supacap End Caps

Operational Managers, Operatives, Contractors and Stores

End Cap Colour Change

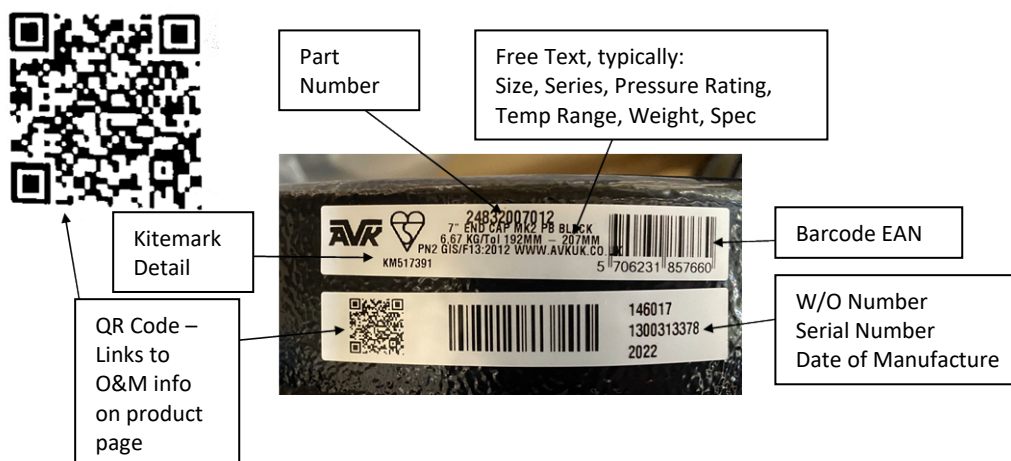

AVK Donkin Series 248/32 Supacap, is a universal end cap used for blanking off the ends of unused metallic pipes and pipelines which are subjected to low pressures. For many years they have supplied these fittings into the gas industry in both blue and black colour options. These fittings will only be available in the standard black colour going forward. The AVK product codes affected are detailed below, any fabricated steel end caps to fit a specific sized large diameter pipe would also be supplied in black.

End Caps Operational & Maintenance Instructions

It has also been highlighted that the end caps do not come with Operational & Maintenance (O&M) instructions. The QR code on the label links to the product page on the website where you will find a copy of the O&M instructions which will include any specific requirements, for example, torque settings
